

John Robison

Cloud Systems Engineer

Pittsburgh PA | jwr@jwr.io

<http://www.linkedin.com/in/johnrobison>

Timezone: US Eastern

Technical Experience

Springbuk, Inc, working remotely from Pittsburgh PA

May 2018 – Present

Senior DevOps Engineer

- Responsible for cloud infrastructure and automation as part of a healthcare SaaS startup, with a focus on the AWS cloud
- Built from scratch a continuous deployment pipeline which builds Docker containers and deploys to Amazon ECS
- Refactored entire cloud estate from Cloudformation to Terraform, to eliminate Cloudformation vendor lock-in, and from Chef to Ansible, to modernize configuration management.
- Reduced ECS and RDS spend by 45%, via right-sizing and spinning down lower environments nights/weekends.
- 100% remote work, all team communication is on Slack / Zoom

Cloudbreach, Inc, working remotely from Pittsburgh PA

Mar 2016 – May 2018

Cloud Systems Engineer

- Implement data center migrations to the AWS cloud for large enterprises, as part of a consulting team
- Build AWS infrastructure as code using Terraform, Cloudformation
- Chef cookbook development for server configuration management
- Build Lambda functions to automate AWS environment maintenance, automate cost reporting, etc
- General Linux administration tasks
- 100% remote work, all team communication is on Slack / Hangouts

Health Monitoring System, Inc, Pittsburgh PA

Apr 2013 – Mar 2016

Linux Administrator

- Responsible for the setup, monitoring, and maintenance of customer facing production Linux application servers and database servers in a

healthcare SaaS environment

- Configuration and troubleshooting of production web, application, and database servers, while aligning with HIPAA requirements
- Built from scratch a disaster recovery environment on AWS which mirrors the production environment.
